

ID	
22	The relation between uniaxial compressive and Brazilian tensile strength <i>J. Rostami, S. Kahraman, X. Yu, H. Copur, C. Balci, W. Bamford, B. Asbury</i>
41	Design and back analysis of NATM tunnels in fractured rock <i>K. Demir, T. Özbayır</i>
69	Excavation damaged zone inferred by geophysical surveys on drift floor of Horonobe URL <i>T. Tokiwa, K. Aoyagi, T. Fujita</i>
76	Pilot test of compressed air storage in underground rock cavern <i>W. K. Song</i>
82	Spraying membrane layer effect on load bearing performance of concrete linings <i>E. Komurlu, A. Kesimal, A.O. Çakır</i>
87	Effect of drilling strength on laboratory scale rock cuttability <i>S. Yasar, A.O. Yilmaz</i>
106	Using directional shear stress models to predict slope stability in highly anisotropic rock masses <i>N. Bar, T.M. Johnson, G. Weekes</i>
111	Investigation of the effect of textural properties towards predicting sawing performance of diamond wire machines <i>D. Tumac, E. Avunduk, H. Copur, C. Balci, S. Er</i>
125	Geomechanical investigations and pioneering monitoring attempts in Cappadocia, Turkey <i>H. Tano, Ö. Aydan, R. Ulusay, T. Tanaka</i>
128	Determining the dominant rock properties affecting the impact hammer performance <i>S. Hojjati, D. Tumac</i>
141	Mine closure rock fall hazard and risk analysis study <i>D.J. Avutia, T. Dlokweni</i>
147	Landslide risks analysis on Cisumdawu highway construction, West Java, Indonesia <i>H. Arbi, S. Andriany, H. Cahyadi, D. Muslim</i>
166	An experimental study on behavior of reconstituted low-rank coal under different fluid saturations <i>A.S. Ranathunga, M.S.A. Perera, R.T. Haque, P.G. Ranjith</i>
167	Investigation on temperature dependent mechanical behaviour of Australian granite <i>W.G.P. Kumari, P.G. Ranjith, M.S.A. Perera, B.K. Chen</i>
178	An experimental study on mechanical behaviour of siltstone under brine saturation <i>W.A.M. Wanniarachchi, P.G. Ranjith, M.S.A. Perera, J. Zhao, M.H.N.D.P. Wickramarathne</i>
185	Determination of mode II toughness of granite by using SCC test <i>Y. Jung, E. Park, H. Kim</i>
189	Method of Poisson's ratio determination based on plastic volumetric strain in triaxial experiment of rock <i>X. Ding, Z.Y. Wang, G.Q. Zhang</i>
213	Investigation of the mechanism and causes of Serdarlı District landslide (Turkish Republic of Northern Cyprus - TRNC) <i>C. Atalar, H. Kumsar, Ö. Aydan, R. Ulusay, R. Kılıç</i>
226	Analysis of shale gas hydraulic fracture induced stress and optimization of perforation cluster spacing <i>Z. Zhou, G.Q. Zhang, D. Zhou, Y. Wang, H. Dong</i>
259	Coal pillar deformation monitoring using terrestrial laser scanner technology in room and pillar panel - A case study from the Ostrava-Karvina Coal Field <i>V. Kajzar, R. Kukutsch, P. Waclawik, P. Konicek</i>

275	Preliminary relationship between weathering behavior profiles and laboratory slake behavior of carbonatic flysch rocks <i>M. Cano, R. Tomás, A. Riquelme</i>
276	Preliminary fractal analysis of fracture spacing inferred from an acoustic televiewer log run in the Basel-1 geothermal well (Switzerland) <i>M. J. A. Moein, B. Valley, M. Ziegler</i>
292	Mode I fracture toughness of rock under confining pressure <i>F. Stoeckhert, S. Brenne, M. Molenda, M. Alber</i>
335	Development of in-situ cyclic triaxial test method to evaluate dynamic deformation characteristics <i>T. Okada, T. Naya, H. Nakamura</i>
339	Theory and application of deep hole floor-break blasting in floor rock burst coal mine <i>S.K. Zhao, Z.G. Deng, Q.X. Qi, H.Y. Li</i>
345	A study on the wear process of impregnated diamond bits via acoustic emission <i>S. Perez, M. Karakus, F. Pellet</i>
347	Numerical modeling and hazard of a cliff in anthropic and historical contexts
348	Rigidity of sandstone at elevated temperatures <i>Á. Török, B. Vásárhelyi</i>
361	Preliminary rock engineering assessment of Salang tunnel (Afghanistan) <i>N. Malistani, Ö. Aydan, J. Tomiyama</i>
378	Simulation of rockfall fragmentation mechanism in a GIS-based tool <i>G. Matas, N. Lantada, J. Gili, J. Corominas</i>
